

Hoovle School System

School, Course Management & Communication System

Good Day,

We would like to introduce you to **Hoovle**, a **complete online school, course and communication system**, which allows full management of school activities, including all classes, students, staff and parents.

It incorporates a combination of features, including a full **communication** system between students and their respective teachers, parents and/or guardians.

Our Customer Support Team is available to setup a **custom** school system within **2 business days**, and we would like to encourage you to visit our website, <http://www.hoovle.com>, to get an idea of what this system can do for your school.

For more information, please download our **Hoovle Security Features** from our website, to get a more in depth look at what exactly Hoovle can do for everyone involved in your school.

Sincerely,

Sherif Nassar; Co-Founder & CEO
